*Re: Irish Orienteering Mapping Grants 2004*

Following my letter of March 1<sup>st</sup> 2004 in which I invited applications for 2004 mapping grants (see copy attached), I have received replies from 10 of the 24 clubs contacted.

The IOA mapping budget for 2004 is €4,000. The table overleaf details how this amount has been allocated.

Some clubs applied for funding outside the scope of my original letter. While these applications had undoubted merit, budget constraints forced me to stick closely to the terms of the letter. However university campus maps have been added in the interest of nurturing university Orienteering. Two university clubs applied for funding, DCUO and DUO. This funding can be used in any way the clubs wish as long as the end product is a new campus map. Also, in recognition of the high costs for the printing of three championship maps for IOC2004, a special supplement of €250 has been granted to BOC.

Map printing grants are for 2004 only; championship maps to be used in 2005 should apply for printing grants in the 2005 budget.

I received queries about which printer a club should invest in. As there is a vast array of printers available, I am not in a position to recommend a specific make/model. However, I did put a query on the o-map eGroup and the replies seem to indicate that the Epson printers that have waterproof ink are worth looking at.

In order to draw down monies against these grants, please send me commercial receipts and I will authorise a cheque from the IOA treasurer. Please remember that I cannot authorise the release of funds based on anything other than a commercial receipt. The exception to this is the €200 allocated to campus maps which will be released when a definite plan has been agreed for the production of the maps.

Monies granted here need not be drawn down in 2004. I have arranged with the IOA Treasurer that these funds are ring-fenced and will not be lost when the 2005 budget is agreed.

On behalf of Irish Orienteering I would like to thank you for the effort and time that you put into Orienteering mapping and I wish you the best of luck in your latest projects.

Regards

Marcus Geoghegan
